

PROGRAM OVERVIEW

- The fellow will focus on Medical Affairs strategy including scientific communications and medical product strategy. The fellow may take part in projects covering 2-3 medical affairs specialties, including:
 - Medical Product Strategy in various therapeutic areas including vaccines, oncology, and rare disease
 - Scientific Communications
 - Publications
 - Medical Information
 - Medical Affairs Operations
 - Real World Evidence Generation
- Projects will be assigned based on the fellow's areas of interest and available opportunities to build the fellow's competencies as a medical affairs professional. Additionally, the fellow may have the option to take part in a 1-3 month rotation in another department outside of Global Medical Affairs at Moderna.
